SUBJECT: Change Proposal IAC-16-1, MK III Driftsight
Control - Elevation Detents, Disapproval of

TO: Contracting Officer

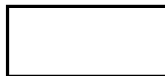

Modification of three MK III Hand Controls to the configuration described by this ECP was authorized by Work Order from the WSSC. The three modified units were for service test. The modification proved unsatisfactory and the three controls have been returned to the original configuration. IAC has been authorized to redesign and modify three additional controls for service test.

Since ECP IAC-16-1 is not satisfactory from a design standpoint, it may not be favorably considered.
